Box No. V	Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	1 - 4	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1 - 4	NO
Industrial applicability (IA)	Claims	1 - 4	YES
	Claims		NO
2. Citations and explanations:			
<p>Document 1: JP. 7-330609, A</p> <p>Document 2: JP. 2002-536403, A</p> <p>Claim 1 Document 1 cited in the ISR describes a plaster for external use having styrene-isoprene-styrene block copolymer, a tackifying resin and a softener as ingredients, and estrogen or progesterone as the active ingredient. And document 2 cited in the ISR describes the idea of letting external plasters containing estrogen or progesterone as the active ingredient contain polyvinyl pyrrolidone. Therefore, it is easy for a person skilled in the art to combine document 1 and document 2 to let an external plaster containing estrogen or progesterone contain styrene-isoprene-styrene block copolymer, a tackifying resin, a softener, and also polyvinyl pyrrolidone.</p> <p>Claims 2, 3 17-β-estradiol and norethisterone acetate are publicly known as estrogen and progesterone respectively, so that it is considered to be easy for a person skilled in the art to limit estrogen and progesterone to these as in the invention of the present application.</p> <p>Claim 4 Because the structure of the backing of the plaster is a matter of design variation that can be decided by a person skilled in the art as required, employing the structure described in this claim for the plaster of the invention of the present application is considered to be easily conceived by a person skilled in the art.</p>
